Elevation of Pallisade fence

Scale = 1 : 20

Notes

This drawing is the property of T.N.P.A
Copyright patents and all industrial rights reserved

All written dimensions to take preference over scaled dimensions.
All levels and dimensions to be checked on site before any work commences.

1. SETTING OUT

- The contractor is to set the fence out by survey instrument and as directed by the Technical Officer on site.
No concreting of the posts will be allowed until the entire fence is set out and approved by the Technical Officer.
- 100mm steps in the steel fence panel must be accommodated in the 'post' foundation depth.

2. FOUNDATIONS

- All excavations to be done by hand and contractor to exercise care during excavations as underground services may be encountered.
- Excavations for posts to be neat dimensions of concrete foundation.
- All insitu founding material to be compacted to 93% Mod and inspected by the Technical Officer prior to pouring concrete.

3. CONCRETE

- All concrete to be min 30MPa at 28 days PBFC containing not less than 40% blastfurnace slag or a 50/50 blend of either OPC or PC15 and blastfurnace blend.
- All concrete to be vibrated and cured using acrylic emulsion at a spread rate of 5 sq.m. per liter, using SIKA - Antisol 15 resin base solvent solution compound that complies with ASTM C309 - Type 1 Class B or similar approved.
- Fence to be bolted to concrete with M16 x 125mm long stainless steel anchor bolts.
- All premix at planted posts to be reinstated

4. STEEL PANELS

- All steel, to be hot-dipped galvanised with minimum zinc coating thickness being 105 microns (Heavy Duty Galvanising). (SABS 763)
- All welds 6mm continuous fillet.
- All bolts, washers & nuts to be stainless steel grade AISI 316. Thread projection beyond nut to be damaged once fastened or tack welded as security measure.
- No cutting of steel or welding on site will be allowed without prior approval from the Technical Officer.
- Contractor to calculate all cutting dimension and to produce shop details for approval by the Technical Officer prior to fabrication.

- VOLUMES (Concrete) :
Posts = 0,0675 cub.m. each.

Cross Section 1

Cross Section 2

Scale = 1 : 20

Notes

- All steel pallisades, posts and other components to be hot dipped galvanised.
