

Razor Mesh Fence

Medium - High Security

Razor Mesh Fence

A Razor Mesh fence consists of straight blade netting welded together forming a diamond shape throughout the fence. Razor Mesh is a high quality product offering sufficient security for any property. Security can be further enhanced via an electrified wall top fence line.

Recommended for:

v Any space needing additional security from a mesh type product, such as water reservoirs, military bases, electrical sub stations, factories, warehouses & construction sites.

The unique characteristics of a razor mesh fence include:

- v Good quality vs. price relevant to other security fencing products.
- v Moderately Long Lifetime
- v Anti-cut properties from standard cutting tools
- v Almost impossible to climb
- v Neat appearance

v No secondary uses - no use in stealing

Wire specifications:

v Apertures: 150 x 300mm (Standard) & 75 x 150mm (High Density)

v Core wire diameter: 2.24mm punched with blades over wire.

Colours:

v Standard Colours: Galvanized Finish

Size

2.4M HIGHT
