

Part C4

Site Information

4 Site Information

4.1 Extent of the works

The Contractor would be required to control of all vegetation by means of herbicides applied by an on-track mechanised method on Transnet property (open lines) in the geographical area controlled by the Depot Engineers for a period of 60 months.

4.2 Location of the works

The location of works will be as indicated in the Price List.
The Employer will provide one-copy schematic diagrams, to the successful tenderer, indicating areas to be treated.
